The Ultimate Guide to Hawaiian Reef Fishes: Sea Turtles ... This comprehensive guide to Hawaii's marine vertebrate animals is based on my bestselling book Hawaii's Fishes, a Guide for Snorkelers and Divers. Although Hawaii's Fishes remains in print and continues to satisfy the basic needs of fish watchers in the Islands, I have long wanted to create a larger, more complete reference for the serious underwater naturalist. Whales, Dolphins and Porpoises: Mark Carwardine, Martin ... This is a great introduction for anyone developing an interest in watching cetaceans. It's packed with all kinds of useful information. The illustrations are tweaked for maximum identification usefulness and each species account-complete with tips on typical behaviours and habits- is accompanied by handy range maps. Dolphin - Wikipedia Dolphins are a widely distributed and diverse group of aquatic mammals. They are an informal grouping within the order Cetacea, excluding whales and porpoises, so to zoologists the grouping is paraphyletic. The dolphins comprise the extant families Delphinidae (the oceanic dolphins), Platanistidae (the Indian river dolphins), Iniidae (the new world river dolphins), and Pontoporiidae (the

Cetacea - Wikipedia Cetacea (/ s ɛˈ ɛː t eɪˈ ɛf ɛɪˈ) are a widely distributed and diverse clade of aquatic mammals that today consists of the whales, dolphins, and porpoises. Cetaceans are carnivorous and finned. Most species live in the sea, some in rivers. The name is derived from the Latin cetus "whale", itself from the Greek ἰχθυόσαυρος, ἰχθύς, κῆτος "huge fish".. There are around 89 extant species, which are. Orcas (Killer Whales), Orcinus orca ~ MarineBio.org Find out what's known about Orcas (Killer Whales), Orcinus orca, Mammalia, Cetacea, Delphinidae, including their world range and habitats, feeding behaviors, life history, ecology, reproduction, and conservation status. Teach the Children Well-Animals This page is a collection of links for children, teachers, and parents. Animal topics are based on the curriculum for Kindergarten through grade four, although many pages will be of interest to older students.

Orca videos, photos and facts - Orcinus orca | Arkive The orca is the world's largest predator of warm-blooded animals , and the only cetacean to routinely hunt marine mammals , including seals, sea lions, dolphins and sea otters .The orca will even kill large whales , and also hunts fish (including sharks and rays), squid, octopuses, sea turtles and seabirds, such as penguins .Despite this varied diet, different orca populations often. Glossary - PBS: Public Broadcasting Service acquired trait: A phenotypic characteristic, acquired during growth and development, that is not genetically based and therefore cannot be passed on to the next generation (for example, the large muscles of a weightlifter). adaptation: Any heritable characteristic of an organism that improves its ability to survive and reproduce in its environment. Also used to describe the process of genetic. Wildscreen Arkive - Discover the world's most endangered ... Wildscreen Arkive - the ultimate multimedia guide to the world's endangered species.
