The Domestic Dog: Its Evolution, Behavior and Interactions ... "The first edition of this book, published more than 20 years ago, broke new ground. It was the prelude to an explosion of research in the field of domestic dog behaviour, which has seen the subject move from largely the fringes of academia to a central position that provides a unique opportunity to explore some fundamental biological questions. Origin of the domestic dog - Wikipedia The origin of the domestic dog is not clear. The domestic dog is a member of the genus *Canis*, which forms part of the wolf-like canids, and is the most widely abundant terrestrial carnivore. The closest living relative of the dog is the extant gray wolf, and there is no evidence of any other canine contributing to its genetic lineage. The dog and the extant gray wolf are sister taxa, as modern. Dog behavior - Wikipedia Dog behavior is the internally coordinated responses of individuals or groups of domestic dogs to internal and external stimuli. It has been shaped by millennia of contact with humans and their lifestyles. As a result of this physical and social evolution, dogs, more than any other species, have acquired the ability to understand and communicate with humans and they are uniquely attuned to.
