WORMING Ducks + Geese | from the Domestic | Waterfowl | Club As an example , if geese or ducks are kept with sheep , goats or cattle the larger species can be wormed and the wormer will cause them to shed parasite eggs . Many of these will be killed , the others are then picked up by the goose or duck and will pass through their system and later reinfect the host, this being a frequent cause of "worm resistance" . The smaller species may also suffer as they may be reinfect via the larger re distributing their own worm eggs.
